

# BOW AND ARROW INSTRUCTIONS

## Tools needed:

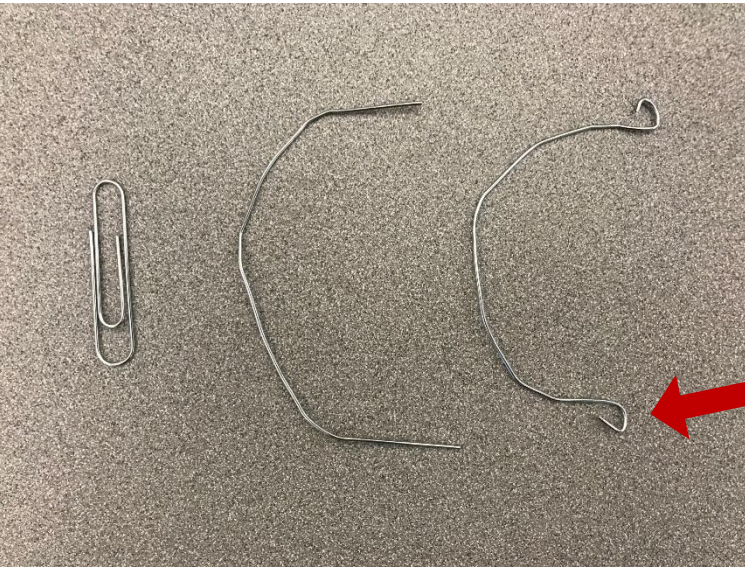

Pliers, scissors, tape

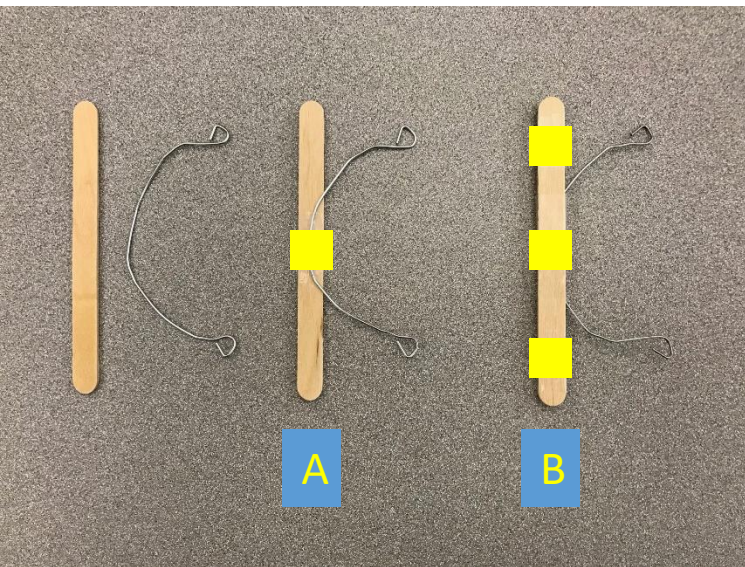

## Items needed:

2 popsicle sticks, 2 Q-Tips, 1 rubber band, 1 paper clip, 1 piece of paper cut in an isosceles trapezoid the size of the shaft of the Q-Tip.

# BOW

Open up the paper clip to a crescent moon shape then use the pliers to curl the ends to make the hooks.

Next, pick one popsicle stick.

A

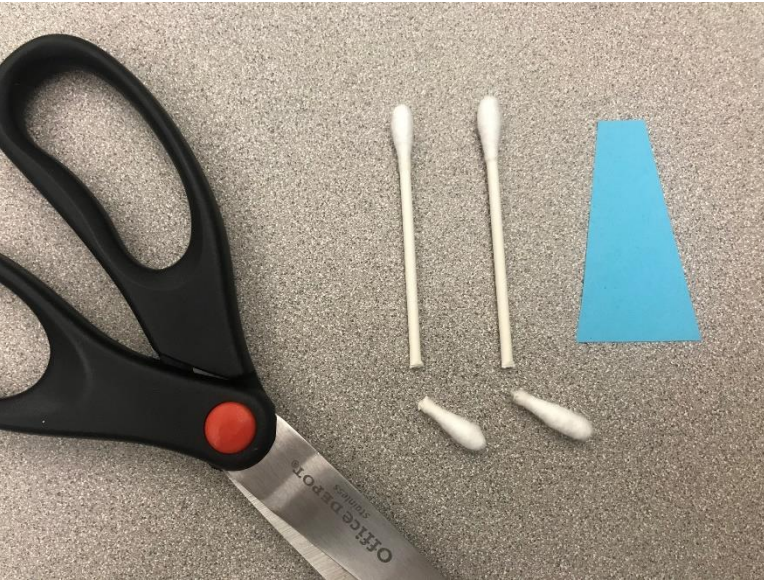

Put the u shaped paper clip in the middle and wrap tape around the paper clip and popsicle stick. I used three wraps around the middle to make it sturdy.

B

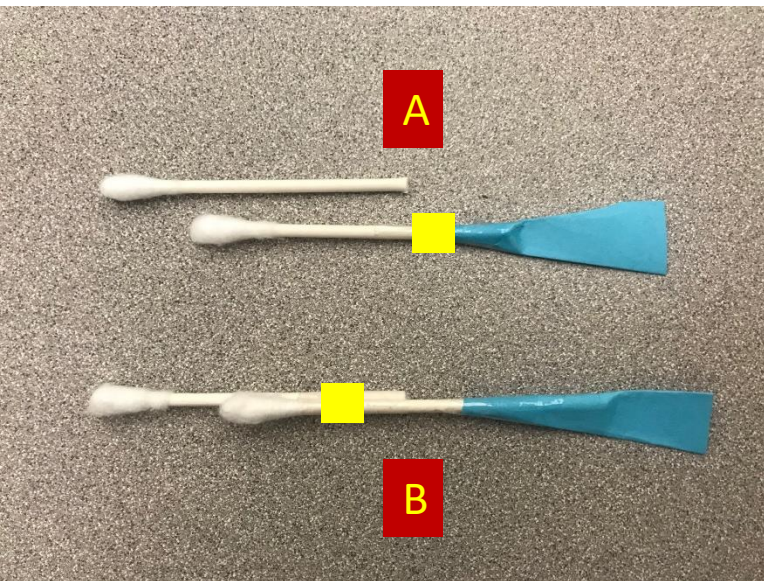

Get the second popsicle stick and place it on top of the other popsicle stick and u shape paper clip. Tape in three spots. Make sure it is tight.

# ARROW

Clip one fuzzy end off of each Q-Tip.  
Cut an isosceles trapezoid shape out of paper to make the tail for the arrow.

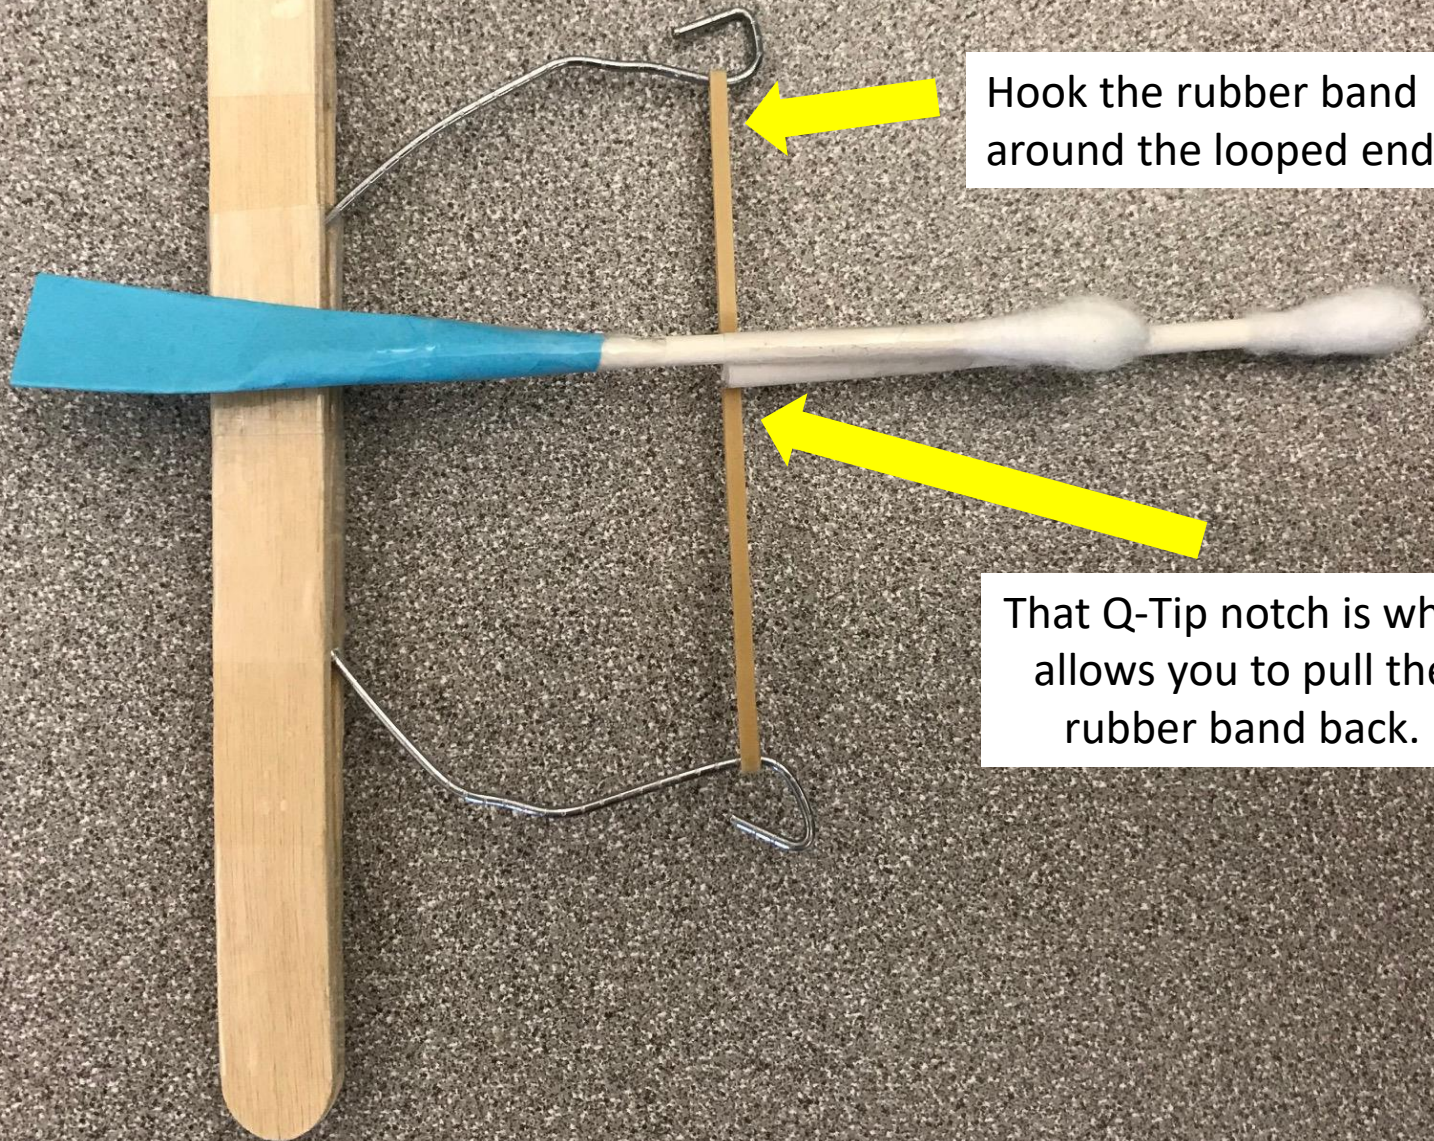

**A** Wrap the paper around one of the ends of the Q-Tip and tape. Make sure to tape the tail to the Q-Tip or it will slide off. 😊 I used two to three pieces of tape.

**B** Tape the other Q-Tip to the Q-Tip with a tail. Notice how I staggered the cotton tips.

# YOUR BOW AND ARROW!

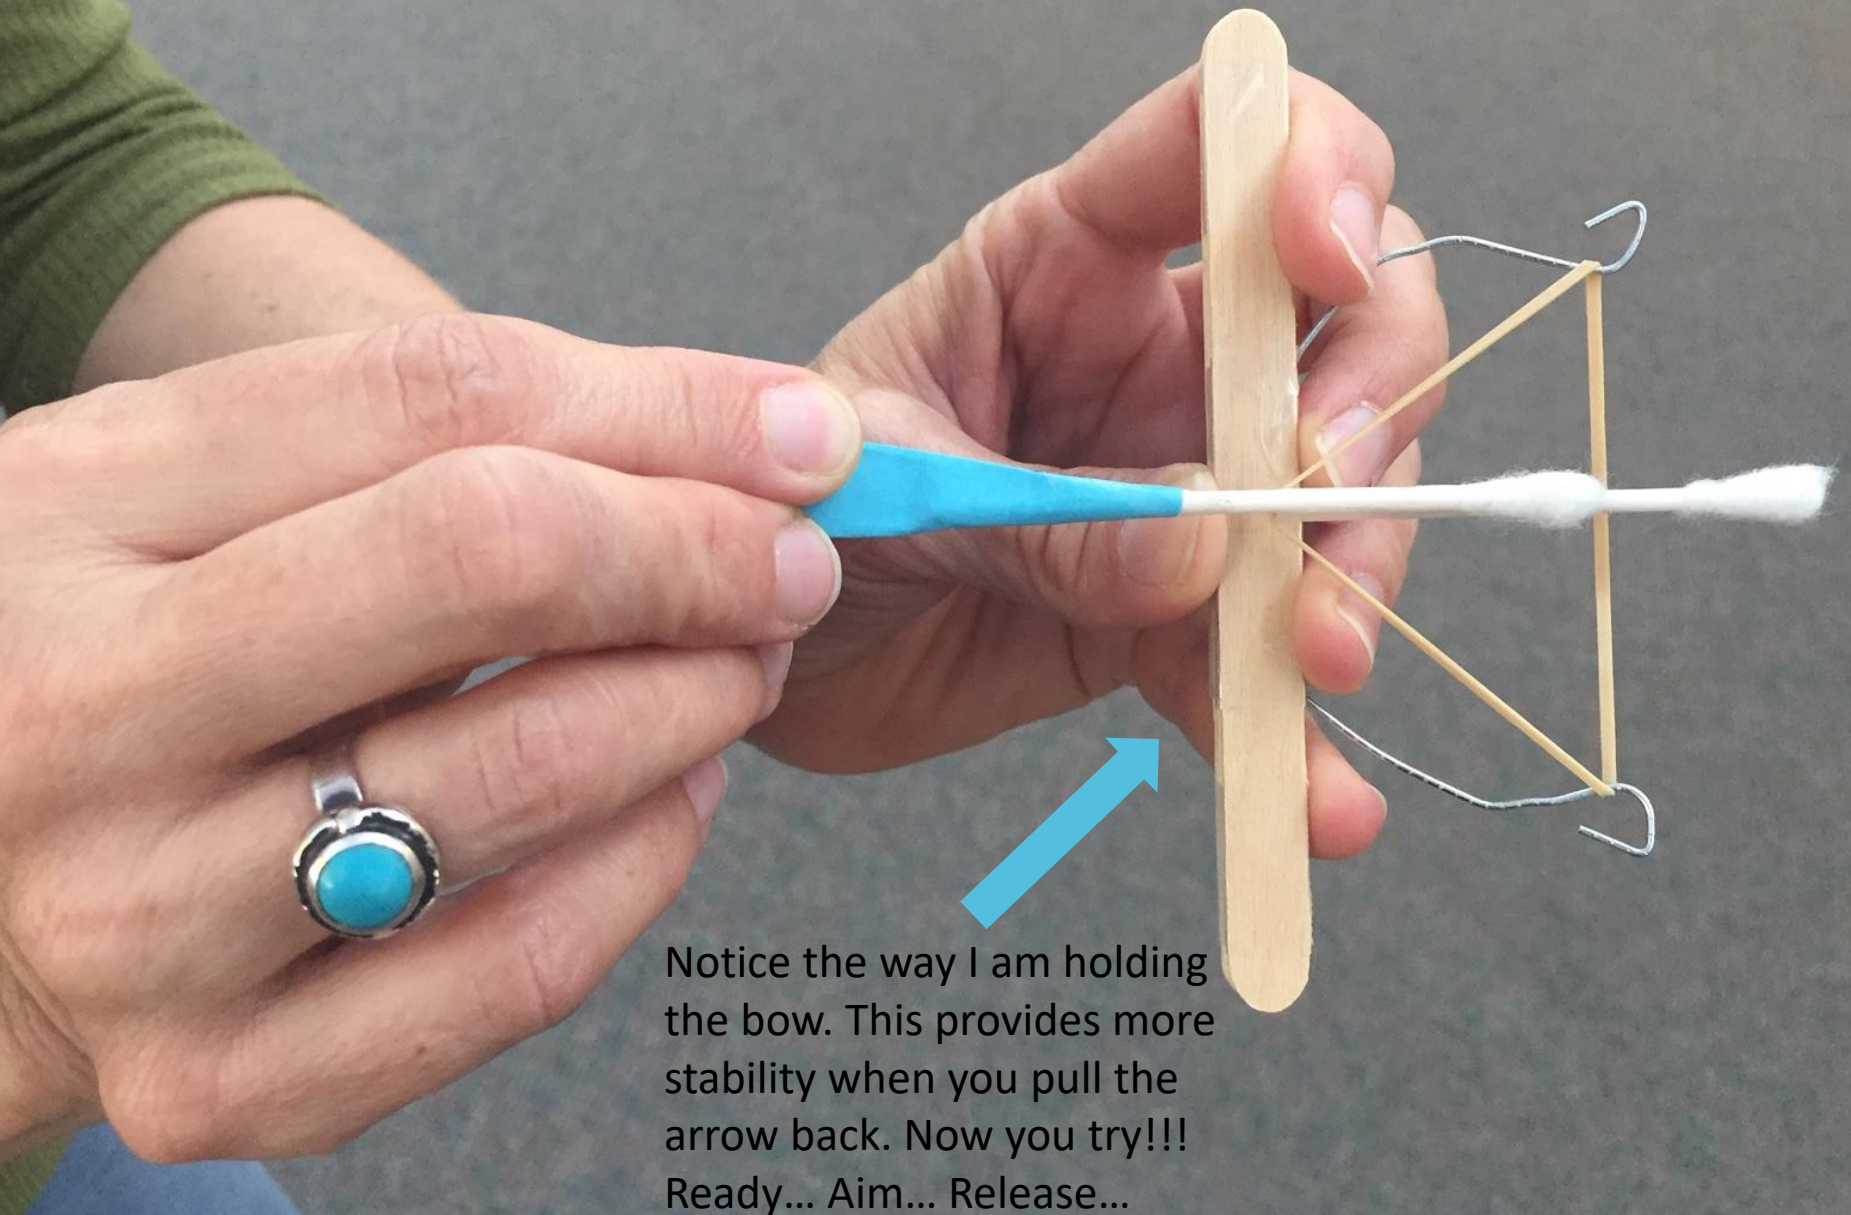

Hook the rubber band around the looped ends.

That Q-Tip notch is what allows you to pull the rubber band back.

May the odds be ever in your favor

Notice the way I am holding the bow. This provides more stability when you pull the arrow back. Now you try!!! Ready... Aim... Release...
